INDEPENDENT AUDITORS' REPORT

English Translation of a Report Originally Issued in Chinese

The Board of Directors and Shareholders

TA YA ELECTRIC WIRE & CABLE CO., LTD.

Opinion

We have audited the accompanying consolidated financial statements of Ta Ya Electric Wire & Cable Co., Ltd and its subsidiaries (the Company), which comprise the consolidated financial balance sheets as of December 31, 2019 and 2018, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and the related notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and the reports of other auditors (refer to the Other Matter section of this report), the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2019 and 2018, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audit in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants", "Financial Supervisory Commission Letter No. 1090360805 of February 25, 2020" and generally accepted auditing standards in the Republic of China ("ROC GAAS"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the consolidated Financial Statements section of our report. We are independent of the Company in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2019. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters for the Company's consolidated financial statements for the year ended December 31, 2019 are stated as follows:

Loss allowance of accounts receivable

The recognition of the loss allowance of accounts receivable is based on the customer's credit quality, situation of collecting payments, and future economic conditions. Since the expected credit loss ratio involves subjective judgments and significant estimates of managements, the loss allowance of accounts receivable is identified as a key audit matter.

The book value of accounts receivable please refer to Notes 10 to the parent company's financial statements.

Our audit procedures consisted of obtaining the management's assessment information of expected credit loss ratio and assess that whether such assumptions is reasonable; recalculating the appropriateness of the recognition of expected credit loss of accounts receivable based on the above expected credit loss ratio; and inspecting specific customers which amount is significant and the reason for not receiving payment. We use above procedures to confirm whether the expected credit loss of accounts receivable have recognized sufficiently.

<u>Inventory evaluation</u>

The company assesses impairment of material based on lower of cost or net realizable value evaluation, and valuation of the inventory is mainly affected by the international copper price, but the international copper market price fluctuations frequently. Since inventory evaluation involves the management's significant judgment, inventory evaluation its assessment is identified as a key audit matter.

The book value of Inventories please refer to Notes 11 to the parent company's financial statements.

Our audit procedures in response to the abovementioned key audit matter were obtaining information pertaining to the lower of cost or net realizable value (LCNRV), sampling projected pricing information and the most recent sales record to assess the reasonableness of the judgment on the LCNRV, and comparing the year-end quantity of inventory items with the inventory count reports to confirm the existence and completeness of the inventory. Moreover, by attending year-end inventory counting, we assessed the condition of inventory and evaluated the adequacy of inventory provisions for obsolete goods.

Other Matter

Certain investments which were accounted for under the equity method based on the financial statements of the investees were audited by other independent accountants. Our audit, insofar as it related to these companies' total assets were NT 2,560,813 thousands and NT 2,332,385 thousands, which represented 12.31% and 11.41% of the total consolidated assets as of December 31, 2019 and 2018, the related shares of net operating revenue from the associates in the amount of NT 2,897,033 thousands and NT 2,923,855 thousands, which represented 15.96% and 15.74% of the total consolidated net operating revenue for the years ended December 31, 2019 and 2018; The investments accounted for under the equity method balance of NT 769,535 thousands and NT 708,429 thousands, which represented 3.70% and 3.47% of the total consolidated assets as of December 31, 2019 and 2018, the related shares of profit of associates and joint ventures accounted for using equity method in the amount of NT 35,725 thousands and NT 40,320 thousands, which represented 6.51% and 7.18% of the consolidated total comprehensive income (loss) for the years ended December 31, 2019 and 2018.

We have audited and expressed an unqualified opinion with other matter paragraph on the parent company only financial statements of the Company as of and for the years ended December 31, 2019 and 2018.

Responsibilities of Management and Those Charged with Governance for the consolidated Financial Statements

Management is responsible for preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including supervisors, are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves

fair presentation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2019 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Solomon & Co. CPS 5

(Concluded)

The accompanying notes are an integral part of the consolidated financial statements (With Solomon & Co., audit report dated March 20, 2020)

TA YA ELECTRIC WIRE & CABLE CO., LTD. AND SUBSIDIARIES

Notes to Financial Statements

December 31, 2019 and 2018

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. Organization

TA YA ELECTRIC WIRE & CABLE CO., LTD. (the Company) was incorporated in November, 1962, mainly engages in the manufacturing and sale of electric wire & cable, and constructing, selling and renting of office and house buildings. The authorized capital was NTD 7,000,000 thousand, of which NTD 5,950,680 thousand was issued as of December 31, 2019. In December 1988, its shares were listed on Taiwan Stock Exchange (TSE).

2. The Authorization Of Financial Statements

The consolidated financial statements were approved and authorized for issue by the Board of Directors on March 12, 2020.

3. Application Of New And Revised International Financial Reporting Standards

a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC), and Interpretations of IAS (SIC) (collectively, the "IFRSs") endorsed and issued into effect by the Financial Supervisory Commission (FSC)

Except for the following, whenever applied, the initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC would not have any material impact on the Company's accounting policies:

1) IFRS 16 "Leases"

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements of both the lessee and the lessor. It supersedes IAS 17 "Leases", IFRIC 4 "Determining whether an Arrangement contains a Lease", and a number of related interpretations. Refer to Note 4 for information relating to the relevant accounting policies.

Definition of a lease

The Group reassesses whether a contract is, or contains, a lease in accordance with the definition of a lease under IFRS 16. Contracts that are reassessed as containing a lease are accounted for in accordance with the transitional provisions under IFRS 16.

The Group as lessee

The Group recognizes right-of-use assets or investment properties if the right-of-use assets meet the definition of investment properties, and lease liabilities for all leases on the consolidated balance sheets except for those whose payments under low-value asset and short-term leases are recognized as expenses on a straight-line basis. On the consolidated statements of comprehensive income, the Group presents the depreciation expense charged on right-of-use assets separately from the interest expense accrued on lease liabilities; interest is computed using the effective interest method. On the consolidated statements of cash flows, cash payments for the principal portion of lease liabilities are classified within financing activities; cash payments for the interest portion are classified within operating activities. Prior to the application of IFRS 16, payments under operating lease contracts were recognized as expenses on a straight-line basis. Prepaid lease payments for land use rights in mainland China were recognized as prepayments for leases. Cash flows for operating leases were classified within operating activities on the statements of cash flows. Leased assets and finance lease payables were recognized on the consolidated balance sheets for contracts classified as finance leases.

Lease liabilities were recognized on January 1, 2019 for leases previously classified as operating leases under IAS 17. Lease liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate on January 1, 2019. Right-of-use assets are measured at an amount equal to the lease liabilities, adjusted by the amount of any prepaid or accrued lease payments. The Group applies IAS 36 to all right-of-use assets.

The Group also applies the following practical expedients:

- a) The Group applies a single discount rate to a portfolio of leases with reasonably similar characteristics to measure lease liabilities.
- b) The Group accounts for those leases for which the lease term ends on or before December 31, 2019 as short-term leases.
- c) The Group uses hindsight, such as in determining lease terms, to measure lease liabilities.

It is expected that there would not be any material impact on the Corporation's accounting policies where the Corporation is a lessor.

The lessee's weighted average lessee's incremental borrowing rate applied to lease liabilities recognized on January 1, 2019 is 1.32%~9.80%. The difference between the lease liabilities recognized and operating lease commitments disclosed on December 31, 2018 is explained as follows:

The	future	minimum	lease	payments	of	non-cancellable	operating	lease	\$ 282,350
commitments on December 31, 2018									
Less: Recognition exemption for short-term leases								(22,032)	
Undiscounted amounts on January 1, 2019							\$ 260,318		
Leas	e liabilit	ies recogniz	ed on J	anuary 1, 20)19				\$ 233,583

The impact on assets, liabilities and equity as of January 1, 2019 from the initial application of IFRS 16 is set out as follows:

			Ad	justments			
	Carrying Amount Ar			ising from	Adjusted Carrying		
	as	of December		Initial	Amount as of		
		31, 2018		Application		uary 1, 2019	
Prepayments for leases - non-current	\$	209,174	\$	(209,174)	\$	_	
Right-of-use assets		_		442,757		442,757	
Total effect on assets	\$	209,174	\$	233,583	\$	442,757	
Lease liabilities - current	\$	_	\$	17,580	\$	17,580	
Lease liabilities - non-current		_		216,003		216,003	
Total effect on liabilities	\$		\$	233,583	\$	233,583	

2) IFRIC 23 "Uncertainty over Income Tax Treatments"

IFRIC 23 clarifies that when there is uncertainty over income tax treatments, the Group should assume that the taxation authority has full knowledge of all related information when making related examinations. If the Group concludes that it is probable that the taxation authority will accept an uncertain tax treatment, the Group should determine the taxable profit, tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatments used or planned to be used in its income tax filings. If it is not probable that the taxation authority will accept an uncertain tax treatment, the Group should make estimates using either the most likely amount or the expected value of the tax treatment, depending on which method the Group expects to better predict the resolution of the uncertainty. The Group has to reassess its judgments and estimates if facts and circumstances change.

b. The IFRSs endorsed by the Financial Supervisory Commission (FSC) for application starting from 2020

New IFRSs	Effective Date Announced by IASB
Amendments to IFRS 3 "Definition of a Business"	January 1, 2020 (Note 1)
Amendments to IFRS 9, IAS 39 and IFRS 7 "Interest Rate Benchmark Reform"	January 1, 2020 (Note 2)
Amendments to IAS 1 and IAS 8 "Definition of Material"	January 1, 2020 (Note 3)

- Note 1: The Group shall apply these amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2020 and to asset acquisitions that occur on or after the beginning of that period.
- Note 2: The Group shall apply these amendments retrospectively for annual reporting periods beginning on or after January 1, 2020.
- Note 3: The Group shall apply these amendments prospectively for annual reporting periods beginning on or after January 1, 2020.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of above standards and interpretations will have on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note)			
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of	To be determined by IASB			
Assets between an Investor and its Associate or Joint Venture"				
IFRS 17 "Insurance Contracts"	January 1, 2021			
Amendments to IAS 1"Classification of Liabilities as Current or	January 1, 2022			
Non-current"				

Note: Unless stated otherwise, the above New IFRSs are effective for annual periods beginning on or after their respective effective dates.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of above standards and interpretations will have on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. Summary Of Significant Accounting Policies

For the convenience of readers, the accompanying parent company only financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language parent company only financial statements shall prevail.

Statement Of Compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRSs as endorsed and issued into effect by the FSC.

Basis Of Preparation

The accompanying parent company only financial statements have been prepared on the historical cost basis except for financial instruments that are measured at fair values, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

The basis for the consolidated financial statements

The consolidated financial statements incorporate the financial statements of TA YA and entities controlled by TA YA (its subsidiaries). Significant intragroup transactions have been eliminated on consolidation.

Subsidiaries included in the consolidated financial statements were reviewed by auditors except for

TAYA ELECTRIC WIRE & CABLE (H.K.).

Operating Cycle

The operating cycle of manufacturing and sale of electric wire & cable is generally shorter than one

year, and the classification of current or non-current is based on one year; the operating cycle of

constructing, selling and renting of office and house buildings is generally longer than one year, and

the classification of current or non-current is based on the operating cycle.

Classification Of Current And Noncurrent Assets And Liabilities

Current assets are assets expected to be converted to cash within one year from the end of the reporting

period. Current liabilities are obligations expected to be settled within one year from the end of the

reporting period. Assets and liabilities that are not classified as current are noncurrent assets and

liabilities, respectively.

Cash Equivalent

Cash and cash equivalents comprise cash on hand, demand deposits and highly liquid investments that

are readily convertible to known amounts of cash and which are subject to an insignificant risk of

changes in value.

The time deposits which with original maturities of less than 3 months and are held for the purpose of

meeting short-term cash commitments rather than for investment or other purpose are classified as

cash equivalents.

21

Financial Instruments

Financial assets and financial liabilities are recognized when a company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

a. The Group's Financial Assets

Measurement category

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis, except derivative financial assets which are recognized and derecognized on settlement date basis.

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortized cost, and equity instruments at FVTOCI.

1) Financial asset at FVTPL

Financial asset is classified as at FVTPL when the financial asset is mandatorily classified or designated at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any dividend or interest earned on the financial asset. Fair value is determined in the manner described in Note 34.

2) Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

(1) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

(2) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash and cash equivalents, and trade receivables at amortized cost, are measured at amortized cost, which equals to gross carrying amount determined by the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for:

- (1) Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset; and
- (2) Financial assets that are not credit-impaired on purchase or origination but have subsequently become credit-impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

Cash equivalents include time deposits with original maturities within 3 months from the date of acquisition or time deposits with original maturities within 3-12 months from the date of acquisition and the interest paid to deposits which are terminated before maturity are higher than demand deposits, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash equivalents are held for the purpose of meeting short-term cash commitments.

3) Investments in debt instruments at FVTOCI

On initial recognition, the Group may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation as at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained

earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including accounts receivable).

The Group always recognizes lifetime Expected Credit Loss (i.e. ECL) for accounts receivable.

For all other financial instruments, the Group recognizes lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL. Expected credit losses reflect the weighted average of credit losses with the respective risks of a default occurring as the weights. Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Derecognition of financial assets

Financial assets are derecognized when the contractual rights to the cash inflow from the asset are terminated, or when the Group transfers substantially all the risks and rewards of ownership of the financial assets.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognized and the part that is derecognized, based on the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part derecognized and the sum of the consideration received for the part

derecognized and any cumulative gain or loss allocated to it that had been recognized in other comprehensive income are recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is derecognized, based on the relative fair values of those parts.

b. Financial liabilities and equity instruments

1) Classification of debt or equity

Debt or equity instruments issued by the Group are classified as financial liabilities or equity in accordance with the substance of the contractual agreement.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognized based on the proceeds received, net of direct issue costs.

Interest related to the financial liability is recognized in profit or loss under nonoperating income and expenses.

2) Financial liabilities at FVTPL

At initial recognition, financial liabilities in this category are measured at fair value. Attributable transaction costs are recognized in profit or loss as incurred. Subsequent to initial recognition, financial liabilities at fair value through profit or loss are measured at fair value and changes therein, which take into account any interest expense, are recognized in profit or loss.

3) Other financial liabilities

Except for those held-for-trading or is designated at fair value through profit or loss, financial liabilities which comprise of short-term and long-term loans, and accounts and other payables, are measured at fair value, plus any directly attributable transaction cost at the time of initial recognition. Subsequent to initial recognition, they are measured at amortized cost calculated using the effective interest method. Interest expense not capitalized as capital cost is recognized in profit or loss.

4) Derecognition of financial liabilities

A financial liability is derecognized when the contractual obligation thereon has been discharged or cancelled or expires. The difference between the carrying amount of a financial liability derecognized and the consideration paid (including any non-cash assets transferred or

liabilities assumed) is recognized in profit or loss.

5) Offsetting of financial assets and liabilities

Financial assets and liabilities are presented on a net basis when the Group has legally enforceable rights to offset, and intends to settle such financial assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously.

Derivative Financial Instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps.

Derivatives are initially recognized at fair value at the date on which the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. When the fair value of derivative financial instruments is positive, the derivative is recognized as a financial asset; when the fair value of derivative financial instruments is negative, the derivative is recognized as a financial liability.

Inventories

Inventories are stated at the lower of cost or net realizable value. Net realizable value represents the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at weighted-average cost at the end of the reporting period.

Investments Accounted For Using Equity Method

Investments accounted for using the equity method are investments in associates.

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The operating results and assets and liabilities of associates are incorporated in these consolidated

financial statements using the equity method of accounting other than those that meet the criteria to be classified as assets held for sale. Under the equity method, an investment in an associate is initially recognized in the consolidated statement of financial position at cost and adjusted thereafter to recognize the Company's share of profit or loss and other comprehensive income of the associate as well as the distribution received. When the Group's share of losses exceeds its interest in associates, the carrying amount of the investment, including any long-term interests that form part thereof, is reduced to zero, and the recognition of further losses is discontinued except to the extent to that the Group has an obligation or has made payments on behalf of the investee.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

Any unrealized gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the Group's interest in the associate

Property, Plant And Equipment

Property, Plant and Equipment are measured at cost less accumulated depreciation and accumulated impairment. Costs include any incremental costs that are directly attributable to the construction or acquisition of the item of property, plant and equipment.

Depreciation is recognized so as to write off the cost of the assets less their residual values over their useful lives, and it is computed using the straight-line method over the following estimated useful lives: land improvements 8 years; buildings 10-55 years; machinery and equipment 8-12 years; transportation equipment 5 years; other 5-12 years. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimates accounted for on a prospective basis. Land is not depreciated.

Any gain or loss arising on the disposal or retirement of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Leases

2019

At the inception of a contract, the Company and its subsidiaries assess whether the contract is, or contains, a lease.

a. The Company and its subsidiaries as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Under finance leases, the lease payments comprise fixed payments and variable lease payments which depend on an index or a rate. The net investment in a lease is measured at (a) the present value of the sum of the lease payments receivable by a lessor and any unguaranteed residual value accrued to the lessor plus (b) initial direct costs and is presented as a finance lease receivable. Finance lease income is allocated to the relevant accounting periods so as to reflect a constant, periodic rate of return on the Group's net investment outstanding in respect of leases.

Lease payments less any lease incentives payable from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases. Initial direct costs incurred in obtaining operating leases are added to carrying amounts of the underlying assets and recognized as expenses on a straight-line basis over the lease terms.

b. The Company and its subsidiaries as lessee

The Group recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments, which comprise

fixed payments, in-substance fixed payments, variable lease payments which depend on an index or a rate, residual value guarantees, the exercise price of purchase option if the Group is reasonably certain to exercise that option, and payments of penalties for terminating a lease if the lease term reflects such termination, less any lease incentives receivable. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, a change in the amounts expected to be payable under a residual value guarantee, a change in the assessment of an option to purchase an underlying asset, or change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Group remeasures the lease liabilities with a corresponding adjustment to the right-of-use assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the consolidated balance sheets.

Variable lease payments that do not depend on an index or a rate are recognized as expenses in the periods in which they are incurred.

2018

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of the ownership to the lessee. All other leases are classified as operating leases.

a. The Company and its subsidiaries as lessor

Amounts due from lessees under finance leases are recognized as receivable at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the lease asset and amortized on a straight-line basis over the lease term.

b. The Company and its subsidiaries as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at

the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated balance sheets as a finance lease obligation.

Finance expenses implicit in lease payments for each period are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets; in which case, they are capitalized. Operating lease payments are recognized as expenses on an effective interest rate over the lease term.

c. Leasehold land for own use

When a lease includes both land and building elements, the Group assesses the classification of each element separately as a finance or an operating lease based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group. The minimum lease payments are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land and element and building element of the lease at the inception of the lease.

If the allocation of the lease payments can be made reliably, each element is accounted for separately in accordance of with its lease classification. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease unless it is clear that both elements are operating leases; in which case, the entire lease is classified as an operating lease.

Investment Properties

Investment properties are properties held to earn rentals and/or for capital appreciation.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation. Depreciation is recognized using the straight-line method.

Intangible Assets

Separately acquired intangible assets with finite useful lives are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized using the straight-line method. The estimated useful life and amortization method are reviewed at the end of each reporting

period, with the effect of any changes in estimate being accounted for on a prospective basis.

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss when the asset is derecognized.

Impairment Of Tangible Assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

When impairment loss subsequently reverses, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Retirement Benefits

For defined contribution retirement benefit plans, payments to the benefit plan are recognized as an expense when the employees have rendered service entitling them to the contribution. For defined benefit retirement benefit plans, the cost of providing benefit is recognized based on actuarial calculation.

For defined benefit retirement benefit plans, the cost of providing benefit is determined using the Projected Unit Credit Method, with actuarial calculations being carried out at year end. Actuarial gains and losses are reported in retained earnings in the period that they are recognized as other comprehensive income.

Treasury Stock

Treasury stock is stated at cost and shown as a deduction in shareholders' equity. When TA YA retires treasury stock, the treasury stock account is reduced and the common stock as well as the capital surplus - additional paid-in capital are reversed on a pro rata basis. When the book value of the treasury stock exceeds the sum of the par value and additional paid-in capital, the difference is charged to capital surplus - treasury stock transactions and to retained earnings for any remaining amount. TA YA's stock held by its subsidiaries is treated as treasury stock and reclassified from investments accounted for using equity method to treasury stock. The gains resulted from disposal of the treasury stock held by subsidiaries and cash dividends received by subsidiaries from TA YA are recorded under capital surplus - treasury stock transactions.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

a. Current tax

Current taxes include tax payables and tax deduction receivables on taxable gains (losses) for the year calculated using the statutory tax rate on the reporting date or the actual legislative tax rate, as well as tax adjustments related to prior years.

Income tax on unappropriated earnings is expensed in the year the shareholders approved the appropriation of earnings which is the year subsequent to the year the earnings are generated.

b. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in consolidated financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences and unused tax credits to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference an it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be recovered. The deferred tax assets which originally not recognized is also reviewed at the end of each reporting period and recognized to the extent that it is probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the year in which liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

c. Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

Foreign Currencies

In preparing the consolidated financial statements, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which case, the exchange differences are also recognized directly in other comprehensive income.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Company's foreign operations (including of the subsidiaries and associates in other countries or currencies used different with the Company) are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising are recognized in other comprehensive income.

Provision

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

Revenue Recognition

The Group identifies the contract with the customers, allocates the transaction price to the performance obligations, and recognizes revenue when performance obligations are satisfied.

a. Sale of goods

Revenues from the sale of goods are recognized when the significant risks and rewards of ownership of the goods are transferred to the customers as follows: domestic sales - when products are move out of the Group's premises for delivery to customers; exports - when products are loaded onto vessels. Revenues are recognized because the earning process is accomplished and revenue is realized or realizable.

Revenues are measured at the fair value, which is the discounted present value of the price (net of commercial discounts and quantity discounts) agreed to by the Group with customers. But if the related receivable is due within one year, the difference between its present value and undiscounted amount is immaterial, and sales transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash to be received. Transaction price received is recognized as a contract liability until performance obligations are satisfied.

b. Construction contract revenue

As construction is in progress, the Group recognizes revenue from construction contract over time. The Group measures the progress on the basis of costs incurred relative to the total expected costs or the units produced and installed relative to estimated total units under the contract as there is a direct relationship between the costs incurred and the progress of satisfying the performance obligation. A contract asset is recognized during the construction and is reclassified to accounts receivable at the point at which it is invoiced to the customer. If the milestone payments exceed the revenue recognized to date, then the Group recognizes a contract liability for the difference. Certain amount retained by the customer as specified in the contract is intended to ensure that the Group adequately complete all contractual obligations. Such retention receivables are recognized as contract assets until the Group satisfies performance obligations.

c. Revenue from the rendering of services

Revenue should be recognized over time by measuring the progress toward complete satisfaction of the performance obligation.

Earnings Per Share

Earnings per share of common stock are calculated based on the weighted-average number of shares outstanding during the period. The increased shares from the capitalization of retained earnings and capital surplus are calculated retroactively.

Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group). Operating results of the operating segment are regularly reviewed by the Group's chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Each operating segment consists of standalone financial information.

5. Critical Accounting Judgments And Key Sources Of Estimation And Uncertainty

In the application of the Group's accounting policies, which are described in Note 4., the directors are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year, or in the year of the revision and future years if the revision affects both current and future years. The following are the critical judgments, apart—from those involving estimations, that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognized in the parent company only financial statements.

a. Impairment of financial assets

The Group always recognizes lifetime Expected Credit Loss (ECL) on accounts receivable. On all other financial instruments, the Group recognizes lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss

allowance for that financial instrument at an amount equal to 12-month ECL.

b. Valuation of financial instrument

The Group's management uses its judgment in selecting an appropriate valuation technique for financial instruments that do not have quoted market price in an active market. Valuation techniques commonly used by market practitioners are applied. For derivative financial instruments, assumptions were based on quoted market rates adjusted for specific features of the instruments. Debt instruments were valued using a discounted cash flow analysis based on assumptions supported, where possible, by observable market prices or rates. The estimation of fair value of listed equity instruments traded in emerging market and unlisted equity instruments was based on the analysis in relation to the financial position and the operation results of investees, recent transaction prices, prices of same equity instruments not quoted in active markets, quoted prices of similar instruments in active markets, valuation multiples of comparable entities, including assumptions based on unobservable market prices or rates.

c. Bonus to employees and directors' and supervisors' remuneration

After taking into consideration income tax rate and the legal reserve and other factors, the Company accrued the bonus payable to employees and the remuneration payable to directors and supervisors at the end date of reporting period in accordance with the required percentage prescribed in the Articles of Association and based on the estimated full-year pre-tax profit.

d. Realization of deferred income tax assets

Deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which those deferred tax assets can be utilized. Assessment of the realization of the deferred tax assets requires the Group's subjective judgment and estimate, including the future revenue growth and profitability, tax holidays, the amount of tax credits can be utilized and feasible tax planning strategies. Any changes in the global economic environment, the industry trends and relevant laws and regulations could result in significant adjustments to the deferred tax assets.

e. Evaluation of inventories

As inventories are stated at the lower of cost and net realizable value, the Group must determine the net realizable value of inventories on balance sheet date using judgments and estimates. Please refer to Note 11.

As the net realizable value of inventories on balance sheet date is assessed to be lower than cost, the Group writes down the cost of inventories to the net realizable value.

Therefore, there might be material changes to the evaluation.

f. Calculation of net defined benefit liabilities

When calculating the present value of defined pension obligations, the Group must apply judgments and estimates to determine the actuarial assumptions on balance sheet date, including discount rates and return on plan assets. Any changes in these assumptions could significantly impact the carrying amount of defined pension obligations. Please refer to Note 22.

6. Cash And Cash Equivalents

a. At the end of the reporting period, outstanding metal commodities futures contract not under hedge accounting were as follows:

		Contract						Gain (Loss)	
	Metric Tons	Maturity Date	Am	ount	Fair Value		on Evaluate		
December 31, 2019									
Buy	225	2020.01~2021.07	USD	1,345	USD	1,395	USD	50	
Sell	8,300	2020.01~2021.04	USD	50,190	USD	51,232	(USD	1,042)	
December 31, 2018									
Buy	475	2020.01~2020.08	USD	2,980	USD	2,833	(USD	126)	
Sell	5,350	2019.01~2019.03	USD	32,851	USD	31,922	USD	929	

b. At the end of the reporting period, outstanding metal options not under hedge accounting were as follows:

			National	
	Metric Tons	Maturity Date	Amounts	Fair Value
December 31, 2019 Sell	1,200	2020.01-2021.01	USD 6,600	USD 125)
December 31, 2018				
Sell	1,200	2019.01-2019.12	USD 6,960	(USD 56))

c. At the end of the reporting period, outstanding Foreign exchange forward contracts not under hedge accounting were as follows:

	Currency	Maturity Date	Contract Amounts (Thousand)
December 31, 2019			
Buy	CNY/USD	2020.02	CNY 35,186/USD 5,000
Buy	NTD/USD	2020.03	NTD 185,799/USD 6,100
December 31, 2018			
Buy	CNY/USD	2019.01	CNY 34,805/USD 5,000
Buy	NTD/USD	2019.03	NTD 353,246/USD 10,910

d. At the end of the reporting period, outstanding Interest rate swap contracts not under hedge accounting were as follows:

	Contract Amounts (Thousand)	Maturity Date	Interest Rate Paid	Interest Rates Received
December 31, 2018			2 ((0) 2 000)	
Interest rate swap contracts	USD20,000	2020.04~2020.06	$2.66\% \sim 2.80\%$	3M USD-LIBOR-BBA
			(Yearly, ACT/360)	(Quarterly , ACT/360)

The Group's strategy for metal commodities futures • metal options • foreign exchange forward contracts and interest rate swap contracts was to hedge exposures to fluctuations of metal prices. However, those contracts did not meet the criteria of hedge effectiveness and therefore were not accounted for using hedge accounting.

8. Financial Assets At Fair Value Through Other Comprehensive Income

	December 31, 2019		December 31, 2018

Allowance for impairment loss		(50,503)		(58,389)
Notes and accounts receivable, net	\$	3,041,110	\$	3,213,552

The average credit period on the sale of goods was approximately $30 \sim 90$ days, and no interest was charged on trade receivables. The determination of the collectability of account receivables and note receivable requires the Group to make judgments on any change of credit quality from the beginning to the end of the credit term.

Before taking new customers, the Group assesses the customers of credit quality and set their line of

credit by Credit Management Method. The management evaluates and confers the line of credit after the Group executes Credit Rating.

The Group applies the simplified approach to estimate expected credit losses prescribed by IFRS9, which permits the use of a lifetime expected losses allowance for all trade receivables. To set the expected credit losses rate, the Group are estimated by reference to past default experience of the debtor, the current financial position of the debtor, and the forecast direction of the future economic conditions

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to recover the receivable due. Where recoveries are made, these are recognized in profit or loss.

a. The aging of receivables that were past due but not impaired was as follows:

December 31, 2019 Expected credit rate	Non Past Due 0%~1%	1-30 Days 0%~2%	31-60 Days 10%~12%	61~365 Days 25%~100%	Over 365 Days 100%	Total
Gross carrying amount	\$ 2,642,145	\$ 367,715	\$ 55,577	\$ 6,733	\$ 19,443	\$ 3,091,613
Loss allowance (Lifetime ECL) Amortized cost	(16,341) \$ 2,625,804					(50,503) \$ 3,041,110
December 31, 2018	Non Past Due	1-30 Days	31-60 Days	61~365 Days	Over 365 Days	Total
Expected credit rate	0%~1%	0%~2%	10%~12%	30%~100%	100%	
Gross carrying amount	\$ 2,855,984	\$ 261,414	\$ 104,995	\$ 39,665	\$ 9,883	\$ 3,271,941
Loss allowance (Lifetime ECL) Amortized cost	(18,553) \$ 2,837,431					(58,389) \$ 3,213,552

b. The movement of the loss allowance of trade receivables was as follows:

Years Ended December 31					
2019			2018		
\$	58,389	\$	51,009		
	4,417		8,371		
	(11,338)		(887)

Tenart Biotech Limited		15,293		_	25.41	_		
	\$	796,332	\$	731,985				

The summarized financial information in respect of the Group's associates is set out below. The summarized financial information below represents amounts shown in the associates' financial statements prepared in accordance with the Accounting Standards Used in Preparation of the Parent Company Only Financial Statements, which is also adjusted by the Group using the equity method of accounting.

	Dece	mber 31, 2019	December 31, 2018			
Total assets	\$	6,172,858	\$	5,270,860		
Total liabilities		(2,776,378)		(2,411,967)		
Net assets	\$	3,396,480	\$	2,858,893		
		Years Ended I	Deceml	per 31		
		2019		2018		
Net revenue	\$	4,451,718	\$	4,041,190		
Net income	\$	369,185	\$	277,960		
The Group's share of profits of associates	\$	39,810	\$	43,414		

The investments accounted for by using the equity method and the share of profit or loss and other comprehensive income of those investments for the years ended December 31, 2019 and 2018 were based on the associates' audited financial statements for the same years then ended except Huizhou Boluo Huxing Flame-Retardant Materials Co.,Ltd and Otto2 Holdings Corporation.

- (1). The Group did not participate in the capital increase of Ad Engineering Corporation in Q3 2019. Therefore, the Group's ownership interest in Ad Engineering Corporation decreased from 30.22% to 27.00%.
- (2). The Group investments Jung Shing Wire Co., Ltd. The closing price represents the quoted price in active markets, the level 1 fair value measurement.

	Decem	ber 31,	De	cember 31,	
	20	19	2018		
Fair value	\$	393,210	\$	402,217	

- (3). The Group participated in the capital increase of Teco(Vietnam) Eletric & Machinery Co.,Ltd. by cash in Q1 2019 and Q3 2018 respectively and the investment amounted to USD\$370 thousand and USD\$1,000 thousand. Because of being not according to the percentage of ownership, its percentage of ownership decreased to 21.10%.
- (4). The Group did not participate in the capital increase of Otto2 Holdings Corporation in Q4 2018. Therefore, the Group's ownership interest in Otto2 Holdings Corporation decreased from 34.97% to 27.27%.
- (5). The Group acquired 2.00% of the ownership of Huizhou Boluo Huxing Flame-Retardant Materials Co.,Ltd by others. Therefore, the Group's ownership interest in Huizhou Boluo Huxing Flame-Retardant Materials Co.,Ltd increased to 33.00%.
- (6). The Group did not participate in the capital increase of AMIT system service Ltd. in Q3 2019. Therefore, the Group's ownership interest in Ad Engineering Corporation decreased from 19.76% to 19.61%.
- (7). The Group participated in the capital increase of Hengs Technology Co., Ltd. by cash in Q2 2019 and the investment amounted to 4,665 thousand shares. Therefore, the Group's ownership interest in Hengs Technology Co., Ltd. increased to 22.86% after having disposed 573 thousand shares in Q3 2019.
- (8). For the year ended December 31, 2019, the Group paid \$17,500 thousand to acquire shares of Tenart Biotech Limited. Therefore, the Group's ownership interest in Tenart Biotech Limited. increased to 25.41%.
- (9). The carrying amounts of investments accounted for using equity method pledged as collateral for bank loans were disclosed in Note 36.

- a. Warranty was based on historical experience, management's judgments and other known reasons for possible returns and rebates. The provision was recognized as a reduction of operating income in the periods the related goods were sold.
- b. The decommissioning liability means that the solar power plants of the Group's subsidiaries have a legal decommissioning obligation when it reaches the operational life in the future and is approved for decommissioning by the competent authority. According to the requirements of International Accounting Standards No. 37 "Provisions, Contingent Liabilities and Contingent Assets", the Group estimates the decommissioning costs at that time and discounts the cost amount at the effective interest rate as the carrying amount of the recognized decommissioning liabilities. Capitalize the cost of decommissioning and increase the carrying amount of property, plant and equipment. The Group recognizes annually the increase in decommissioning liabilities due to discounts over time, and also recognizes interest expenses. The Group reviews changes in decommissioning obligations at the end of each reporting period and adjusts to reflect the best estimates.

22. Retirement Benefit Plans

a. Defined contribution plans

The Group adopted a pension plan under the Labor Pension Act (LPA), which is a state-managed defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages. The foreign subsidiaries are also required to contribute a specified percentage of payroll costs. Accordingly, the Group recognized expenses of NT\$21,651 thousand and NT\$20,220 thousand for the years ended December 31, 2019 and 2018, respectively.

b. Defined benefit plans

(a) TA YA ELECTRIC WIRE & CABLE CO., LTD., CUPRIME MATERIAL CO., LTD., TA HENG ELECTRIC WIRE & CABLE CO., and LTD., TA HO ENGINEERING, CO., LTD. have defined benefit plans under the R.O.C. Labor Standards Law that provide benefits based on an employee's length of service and average monthly salary for the six-month period prior to retirement. The Group contributes an amount equal to 15% of salaries paid each month to their respective pension

funds (the Funds), which are administered by the Labor Pension Fund Supervisory Committee (the Committee) and deposited in the Committee's name in the Bank of Taiwan. Before the end of each year, the Group assesses the balance in the Funds. If the amount of the balance in the Funds is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, the Group is required to fund the difference in one appropriation that should be made before the end of March of the next year. The Funds are operated and managed by the government's designated authorities; as such, the Group does not have any right to intervene in the investments of the Funds. The amounts arising from the defined benefit obligation of the Group in the parent company only balance sheets were as follows:

	Decemb	per 31, 2019	Decem	ber 31, 2018
Present value of funded defined benefit obligation	\$	(539,133)	\$	(537,692)
Fair value of plan assets		476,653		392,878
Net defined benefit liability	\$	(62,480)	\$	(144,814)
Net defined benefit liability	\$	(66,743)	\$	(144,814)
Net defined benefit asset	\$	4,263	\$	_

(b) Movement in the present value of the defined benefit obligation were as follows:

	Years Ended December 31				
		2019		2018	
Balance, beginning of year	\$	537,692	\$	533,726	
Current service cost		8,380		7,173	
Interest cost		3,999		4,895

other					
comprehensive income		10,057		26,593	
Benefits paid		(20,995)		(34,695)	
Balance, end of year	\$	539,133	\$	537,692	

(c) Movements in the fair value of the plan assets were as follows:

Years Ended December 31				
	2019	2018		
\$	392,878	\$	336,181	
	3,000		3,171	
	13,226		9,603	
	88,544		78,618	
	(20,995)		(34,695)	
\$	476,653	\$	392,878	
		2019 \$ 392,878 3,000 13,226 88,544 (20,995)	2019 \$ 392,878 \$ 3,000 13,226 88,544 (20,995)	

(d) Amounts of expenses recognized in comprehensive income statements are as follows:

	Years Ended December 31				
	2019		2019 20		
Current service cost	\$	8,380	\$	7,173	
Net interest cost		1,000		1,724	
Current pension costs		9,380		8,897	
Remeasurement:					
Return on plan assets (excluding amounts					
included in net interest expense)		(13,226)		(9,603)	
Actuarial loss arising from experience adjustments		6,002		18,514	
Actuarial gain from changes in demographic					
assumptions		(5)		(2)	
Actuarial loss arising from changes in financial					
assumptions		4,060		8,081	
Components of defined benefit costs recognized					
in other comprehensive income		(3,169)		16,990	
Total	\$	6,211	\$	25,887	

(e) An analysis by function of the amounts recognized in profit or loss in respect of the defined benefit plans is as follows:

	Years Ended December 31					
	2019			2018		
Operating costs	\$	4,842	\$	5,639		
Research and development expenses		388		181		
General and administrative expenses		3,282		2,797		
Selling and marketing expenses		868		822		
Total	\$	9,380	\$	9,439		

(f) The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations were as follows: :

	Decen	December 31			
	2019	2018			
Discount rate	0.65%~0.95%	0.75%~0.95%			
Future salary increase rate	0.80%~1.25%	0.80%~1.25%			

Through the defined benefit plans under the R.O.C. Labor Standards Law, the Group is exposed to the following risks:

- (g) Investment risk: The pension funds are invested in equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the government's designated authorities or under the mandated management. However, under the R.O.C. Labor Standards Law, the rate of return on assets shall not be less than the average interest rate on a two-year time deposit published by the local banks and the government is responsible for any shortfall in the event that the rate of return is less than the required rate of return.
- (h) Interest risk: A decrease in the government bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the debt investments of the plan assets.
 - Assuming a hypothetical decrease in interest rate at the end of the reporting period contributed to a decrease of 0.25% in the discount rate and all other assumptions were held constant, the present value of the defined benefit obligation would increase by NT\$11,580 thousand and NT\$12,028 thousand as of December 31, 2019 and 2018, respectively.
- (i) Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.
 - Assuming the expected salary rate increases by 0.25% at the end of the reporting period and all other assumptions were held constant, the present value of the defined benefit obligation would increase by NT\$11,521 thousand and NT\$11,976 thousand as of December 31, 2019 and 2018, respectively.

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability.

The Group expects to make contributions of NT\$31,950 thousand to the defined benefit plans in the next year starting from December 31, 2019.

23. Equity

a. Capital stock

- (1) As of December 31, 2019 and 2018, the Group's authorized capital was NT\$7,000,000 thousand and the paid-in capital was NT\$5,950,680 thousand and NT\$5,721,808 thousand, consisting of 595,068,022 shares and 572,180,791 shares respectively of ordinary stock with a par value of NT\$10 per share.
- (2) The Group's shareholders resolved to distribute share dividends of \$228,872 thousand in June 12, 2019, which were approved by the FSC. The subscription base date were August 6, 2019 as determined by the board of directors.

b. Capital surplus

In accordance with the Group Act, realized capital reserves can only be reclassified as share or be distributed as cash dividends after offsetting against losses. The aforementioned capital reserves include share premiums and donation gains.

ROC SEC regulations also stipulate that a capital increase by transferring paid-in capital in excess of par value can be done only once a year and only in years other than the year in which such excess arose. The amount of such capitalization depends on the Group's operating results and is limited to a certain ratio of paid-in capital in excess of par value in relation to issued capital.

c. Retained earnings (Accumulated deficit) and dividend policy

The Group's articles of incorporation provide that annual earnings are to be appropriated as follows:

- (a) Payment of tax;
- (b) Offset accumulated deficits, if any;
- (c) Of the remaining balance, if any, 10% is to be set aside as legal reserve.

(d) 20% to 90% as appropriate dividends to stockholders; cash dividend should not lower than 10% of such dividends.

The bonus to employees and remuneration to directors and supervisors, representing at least 1% and at most 3% of net income (net of bonus and remuneration) less accumulated deficit, 10% legal reserve and special reserve, respectively, were recognized for the years ended. The amounts were estimated based on past experience. Material differences between these estimates and the amounts proposed by the board of directors in the following year are adjusted in the current year. If the actual amounts subsequently resolved by the stockholders differ from the proposed amounts, the differences are recorded in the year of stockholders' resolution as a change in accounting estimate. Information on the earnings appropriation and the bonus to employees, directors and supervisors is available on the Market Observation Post System website of the Taiwan Stock Exchange.

The appropriation for legal capital reserve shall be made until the reserve equals the Group's paid-in capital. The reserve may be used to offset a deficit, or be distributed as dividends in cash or stocks for the portion in excess of 25% of the paid-in capital if the Group incurs no loss.

Pursuant to existing regulations, the Group is required to set aside additional special capital reserve equivalent to the net debit balance of the other components of stockholders' equity. For the subsequent decrease in the deduction amount to stockholders' equity, any special reserve appropriated may be reversed to the extent that the net debit balance reverses.

WLC appropriates or reverses their special reserve in accordance with Order No. 1010012865, Order No. 1010047490 and Order No. 1030006415 issued by the FSC and the directive entitled "Questions and Answers on Special Reserves Appropriated Following the Adoption of IFRSs".

The appropriations of earnings for 2018 and 2017 had been approved in the stockholders' meetings on June 12, 2019 and June 5, 2018, respectively. The appropriations and dividends per share were as follows:

	Appropriation of Earnings			arnings	Dividends Per	Share(NT\$)		
	For Fiscal		For Fiscal		For Fiscal		For Fiscal	For Fiscal
	Year 2018		Year 2017		Year 2017		Year 2018	Year 2017
Legal capital reserve	\$	40,499	\$	46,746		_		
Cash dividends		171,654		200,263	0.30	0.35		
Share dividends		228,872		_	0.40	_		
	\$	441,025	\$	247,009				

d. Others

1) Foreign currency translation reserve

	For the Year Ended December 31				
		2019	2018		
Balance, beginning of year	\$ (138,115)		\$	(138,036)	
Exchange differences arising on translation					
foreign operations		(29,561)		29,503	
Share of other comprehensive income (loss)					
of associates		(26,553)		(30,974)	
Income tax effect		8,166		1,392	
Balance, end of year	\$	(183,063)	\$	(138,115)	

Exchange differences relating to the translation of the results and net assets of the Group's foreign operations from their functional currencies to the Group's presentation currency (i.e. New Taiwan dollars) were recognized directly in other comprehensive income and accumulated in the foreign currency translation reserve. Exchange differences previously accumulated in the foreign currency translation reserve were reclassified to profit or loss on the disposal of the foreign operation.

2) Unrealized gain (loss) on financial assets at fair value through other comprehensive income

	For the Year Ended December 31				
		2019		2018	
Beginning balance	\$	20,508	\$	23,237	
Unrealized loss on financial assets at fair					
through other comprehensive income		23,801		11,965

There were 1,759 and 1,758 employees in the Company 4 and 5 of the directors do not doubled as employee as of December 31, 2019 and 2018, respectively.

According to the Company's Articles of Incorporation, the Company shall allocate compensation to directors and profit sharing bonus to employees of the Company not more than 3% and 1% of annual profits during the period, respectively.

The employees' compensation and remuneration of directors for the years ended December 31, 2018 and 2017 were as follows:

	Years Ended December 31			
	2019 20		2018	
Employees' compensation	\$	6,102	\$	5,626
Remuneration of directors	\$	18,307	\$	16,878

If there is a change in the proposed amounts after the annual standalone financial statements are authorized for issue, the difference is recorded as a change in accounting estimate.

The employees' compensation and remuneration of directors for the years ended December 31, 2018 and 2017 which have been approved by the Corporation's board of directors in March 2019 and 2018, respectively, were as follows:

	Years Ended December 31				
		2018		2017	
Employees' compensation	\$	5,626	\$	5,023	
Remuneration of directors	\$	16,878	\$	15,070	

There was no difference between the actual amounts of employees' compensation and remuneration of directors paid and the amounts recognized in the standalone financial statements for the years ended December 31, 2018 and 2017.

Information on the employees' compensation and remuneration of directors resolved by the board of directors are available at the Market Observation Post System website of the Taiwan Stock Exchange.

33. Capital Management

The Company's strategy for managing the capital structure is to lay out the plan of product development and expand the market share considering the growth and the magnitude of industry and further developing an integral plan founded on the required capacity, capital outlay, and magnitude of assets in long-term development. Ultimately, considering the risk factors such as the fluctuation of the industry cycle and the life cycle of products, the company determines the optimal capital structure by estimating the profitability of products, operating profit ratio, and cash flow based on the competitiveness of products.

The capital structure of the Company consists of net debt (borrowings offset by cash and cash equivalents) and equity of the Company (comprising issued capital, reserves and retained earnings).

The management of the company periodically examines the capital structure and contemplates on the potential costs and risks involved while exerting different financial tools. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders and issue new shares to reduce debt.

There were no changes in the Company's approach to capital management for the year ended December 31, 2019.

34. <u>Financial Instruments</u>

a. Financial risk management objective

The Company manages its exposure to risks relating to the operations through market risk, credit risk, and liquidity risk with the objective to reduce the potentially adverse effects the market uncertainties may have on its financial performance.

The plans for material treasury activities are reviewed by Board of Directors in accordance with procedures required by relevant regulations or internal controls. During the implementation of such plans the company must comply with certain treasury procedures that provide guiding principles for overall financial risk management and segregation of duties.

b. Market risk

The Company is exposed to the market risks arising from changes in foreign exchange rates, interest rates and utilizes some derivative financial instruments to reduce the related risks.

(a) Foreign currency risk

Some of the Company's operating activities are denominated in foreign currencies. Consequently, the Company is exposed to foreign currency risk. To protect against reductions in value and the volatility of future cash flows caused by changes in foreign exchange rates, the Company utilizes derivative financial instruments, including currency forward contracts and short-term borrowings in foreign currencies, to hedge its currency exposure.

The Company's significant exposure to foreign currency risk were as follows:

	I	December 31, 2018	3	December 31, 2017				
	Foreign	Exchange		Foreign	Exchange			
	currency	rate	NT\$	currency	rate	NT\$		
<u>Assets</u>								
Monetary items								
USD	\$ 71,453	30.10	\$ 2,150,735	\$ 68,483	30.72	\$ 2,103,798		
HKD	915	3.86	3,532	1,944	3.92	7,620		
CNY	2,368	4.32	10,230	18,441	4.47	82,431		
JPY	253,717	0.28	71,041	162,514	0.28	45,504		

	I	December 31, 2018	3	December 31, 2017			
	Foreign Exchange			Foreign	Exchange		
	currency	rate	NT\$	currency	rate	NT\$	
<u>Liabilities</u>							
Monetary items							
USD	\$ 87,168	30.10	\$ 2,623,757	\$ 107,090	30.72	\$ 3,289,805	
CNY	1,513	4.32	6,536	630	4.47	2,816	
JPY	126,610	0.28	35,451	_	_	_	

Foreign currency sensitivity analysis

The Company's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, accounts receivable, financial assets at fair value through profit or loss, loans and borrowings, accounts payable that are denominated in foreign currency. A strengthening (weakening) 1% of appreciation (depreciation) of the NTD against the foreign currency for the years ended December 31, 2019 and 2018 would have increased (decrease) the net profit after tax by NT\$4,302 thousand and NT\$10,533 thousand, respectively.

(b) Interest rate risk

The Company was exposed to fair value interest rate risk and cash flow interest rate risk because the Company hold assets and liabilities at both fixed and floating interest rates.

<u>Interest rate sensitivity analysis</u>

The following sensitivity analysis is based on the risk exposure to interest rates on the non-derivatives financial instruments on the reporting date. For variable rate instruments, the sensitivity analysis assumes the variable rate liabilities are outstanding for the whole year on the reporting date.

If the interest rate increases (decreases) by 0.1%, all other variable factors that remains constant, the Company's net profit after tax would have (decreased) increased by NT\$8,734 thousand and NT\$9,306 thousand for the years ended December 31, 2019 and 2018, respectively. This is mainly due to the Company's net assets in floating rates.

(c) Other price risk

The Company is expensed to equity price risk arising from equity investments.

Equity price sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period.

If equity prices had been 5% higher/lower, the Company's net profit after tax for the years ended December 31, 2019 and 2018 would have been higher/lower by NT\$95,702 thousand and NT\$69,332 thousand, respectively, as a result of the fair value changes of Financial assets at fair value through profit or loss.

c. Credit risk management

Credit risk refers to the risk that a counter-party will default on its contractual obligations resulting in financial loss to the Company. The Company is exposed to credit risk from operating activities, primarily trade receivables, and from financing activities, primarily deposits, fixed-income investments and other financial instruments with banks. Credit risk is managed separately for business related and financial related exposures.

Business related credit risk

To maintain the quality of receivables, the Company has established operating procedures to manage credit risk.

For individual customers, risk factors considered include the customer's financial position, credit rating agency rating, the Company's internal credit rating, and transaction history as well as current economic conditions that may affect the customer's ability to pay. The Company also has the right to use some credit protection enhancement tools, such as requiring advance payments, to reduce the credit risks involving certain customers.

Financial credit risk

Bank deposits, fixed income investment and other financial instruments are credit risk sources required by the Parent Company's Department of Finance Department to be measured and monitored. However, since the Company's counter-parties are all reputable financial institutions and government agencies, there is no significant financial credit risk.

d. Liquidity risk management

The objective of liquidity risk management is to ensure the Company has sufficient liquidity to fund its business requirements associated with existing operations. The Company manages its liquidity risk by maintain adequate cash and banking facilities.

The table below summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments, including principles and interest.

e. Fair value of financial instruments

(a) Fair value of financial instruments carried at amortized cost

The Company considers that the carrying amounts of financial assets and financial liabilities recognized in the parent company only financial statements approximate their fair values.

(b) Valuation techniques and assumptions used in Fair value measurement

The Fair value of financial assets and financial liabilities are determined as follows:

- The fair value of financial assets and financial liabilities with standard terms and conditions
 and traded on active liquid markets are determined with reference to quoted market prices
 (includes publicly traded stocks).
- Forward exchange contracts and cross currency swap contracts are measured using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts.
- The fair values of other financial assets and financial liabilities in accordance with generally accepted pricing models based on discounted cash flow analysis.

(c) Fair value measurements recognized in the parent company only balance sheets

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

 Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	December 31, 2019								
	I	Level 1	I	Level 2		Level 3	Total
