# TA YA Electric Wire & Cable Co., Ltd.
# Environmental Policy

The Company has established its Environmental Policy in accordance with the ISO 14001 Environmental Management System, with a commitment to complying with applicable governmental environmental laws and regulations and customer requirements, enhancing employees' environmental awareness, fulfilling responsibilities for pollution control and resource recycling, protecting the environment, and pursuing continual improvement.

1. Compliance with applicable laws and regulations and fulfillment of stakeholder requirements are obligations of the Company. In addition to complying with domestic environmental regulations announced by the competent environmental authorities, international environmental conventions, stakeholder requirements, and other applicable environmental laws and regulations, the Company shall strive to preve pollution and continually improve its environmental performance.
2. The Company shall establish environmental management objectives, targets, and programs to continuously promote waste reduction in production processes, pollution prevention and control, and resource recycling. The effectiveness of implementation shall be evaluated through regular internal audits and management reviews to support the Company's sustainable development.
3. The Company shall effectively implement its environmental management system, enhance employees' awareness of their environmental responsibilities, strengthen their capabilities for self-management, and promote participation by all employees.
4. The Company shall use energy and resources efficiently, promote energy conservation and waste segregation, reduce waste generation, and enhance resource recycling and reuse.
5. Environmental protection is a shared responsibility of all personnel. The Company shall pursue continual improvement and strive for excellence in environmental management.
